INDEX TO VOLUME XXXVII

January 1 to June 30, 1913

Explanatory Note.

Illustrated articles are marked with an asterisk (*). Book notices are denoted by a dagger (†). The cross references condense the matter and assist the reader, but are not to be regarded as complete or conclusive. So, if there were a reference from "Boiler" to "Furnace" and if the searcher failed to find the required article under the latter word, he should look through the "Boiler" entries, or others that the topic might suggest, as he would have done had there been no cross reference. A reference from "Oil" to "Lubricant" would apply equally to "Lubrication," "Lubricator," etc. Letters are indexed under title or subject, general articles under writer's name as well. Not all articles relating to a given topic necessarily appear under the same entries.

Following is a list of the pages included in the several numbers of the volume, by date:
